

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections...This law has improved my time at home by not annoying us constantly with unwanted phone soliciations. My husband sleeps during the day & I retire early and the constant interruptions during the day and late evening were annoying us until this law came into effect. Prior to this law we received anywhere from 10-25 calls a week, some nights as many as 5-6 calls, now we maybe 1-2 a week. Please do not lessen these protections. Thank you for your attention to this message
